Quality is more than making a good product

Securikey started as, and is still very heavily involved in supplying and supporting the retail stockist. We believe this is the best way to convey to the end client the quality of the product and its long term ongoing support in whatever form that takes.

Whilst we offer a product range that meets today's modern demands of high quality and competitive prices, other factors that have enabled us to consistently grow year-on-year since starting the business in 1973 are:

- **Extended guarantees in respect of materials and workmanship.**
- **Delivery and installation service on all products from key storage to modular strongrooms.**
- **Bespoke units to match customers needs, be that alternative colours, specialist locking or size etc.**
- **Insurance liaison to help overcome a particular clients issues.**
- **Branded & unbranded literature, point of sale & display stands.**
- **Joint site calls for more complex installations to enhance client confidence and ensure keenest price.**

But most importantly, long serving staff that go beyond expectations to ensure that we supply products that are never returned to customers who do.
