Toolmate™ Retractable Tool Tether 0.45kg Capacity

Toolmate™ Retractable Tool Tether 0.45kg Capacity

Standard, non-retracting tool tethers become entangled, leading to accidents. The Toolmate™ retractable tool tether has a 1,200mm UHMWPE cord, which stays retracted when not in use, alleviating accidents and making the workplace safer for your employees. The 0.45kg. maximum drop capacity reduces the risk of heavy tools falling, causing physical injuries and costly tool replacements.

- Impact resistant polycarbonate body.
- 1,200mm orange UHMWPE cord, minimizes snagging and prevents entanglement.
- 130mm locking intervals, creating slack if required.
- Retraction force of 170g.
- Aluminium 360° swivel karabiner with locking screw gate, allows tools to easily rotate while in use.
- Independently Tested – All units are tested and verified through a third party testing facility, to a 2:1 safety factor.
- **ANSI / ISEA 121-2023 Certified**

Specification

SKU	RTM-0.45
Weight	0.11kg
Cable Length	1,066mm
